

*Amended*

a request for information concerning the current location of said second mobile unit.

*Amended*

23. (Amended) A system, comprising:

a first mobile unit and a second mobile unit connected to a data network; and

a processing station connected to said data network and receiving current locations over said data network from said first and second mobile unit, the processing station being connected to a database storing said current locations of said first and second mobile units and, upon request from the first mobile unit, providing the first mobile unit the stored current location of the second mobile unit.
